The schematic below shows Penn products in a numerical diagram as used in a typical steam system. The numbers represent a product line that is described under that section of this catalog. Penn also offers a system approach such as \bigcirc , \bigcirc , \bigcirc , \bigcirc which can be used as a complete boiler blowdown package or could be used individually at various locations in the plant. Some products have other uses besides in a boiler room such as Entrainment Separators or Exhaust Silencers for compressed air systems, natural gas lines, and chemical processing.

- Blowdown Separator /
 Blowoff Tank
- (2) Condensate Aftercooler
- Temp. Regulator Valve
- 4 Automatic Continuous Blowdown Control
- (5) Flow Control Valve

- 6 Sample Cooler
- (7) Chemical Feeder
- 8 Test Equipment
- 9 Flash Separator/Tank
- (10) Entrainment Separator

- 11) Exhaust Head
- 12) Exhaust Silencer
- (13) Mist Separator
- (14) Flash Economizer/Cont. Blowdown Heat Recovery
